Many more Safety Products available.

Premolded plastic termination strips are used in conjunction with hand troweled or self-leveling resinous flooring systems. The PTS strips are adhered horizontally to the wall surface to form a controlled edge for the placement of the formed cove or glued to horizontal substrates for controlled termination of the flooring systems.

ADVANTAGES

- ✓ Ease of application
- ✓ Flexible plastic allows quick on-site application
- ✓ Available with or without self-adhering tape
- ✓ Controls height and thickness of edge

SIMPLE INSTRUCTIONS

- ✓ Apply to clean and sound surface
- ✓ Remove protective strip from tape and adhere PTS strip at required height or glue with appropriate adhesive
- ✓ Cut strips to length with ordinary jobsite tools
- ✓ Snip top edge in a "V" to allow strip to bend for outside or inside corners

COMPONENTS: All of the PTS strips are available in Clear and 6 standard colors (Gray, Red, Blue, White, Black and Green). Other colors are available upon request. PTS strips are manufactured in 5' lengths. Other shapes and configurations are available upon request.
